Collective Investment Schemes (unit trusts) are generally medium-to long-term investments. Past performance is not necessarily a guide to future investment performance. Unit trust prices are calculated on a net asset value basis. This means the price is the total net market value of all assets of the unit trust fund divided by the price of the total net market value of all assets of the unit trust fund divided by the price of the standard prices, and the price of the standard prices, and the prices are prices, lond of units and the price of the standard prices of the standard prices are traded at the ruling forward price of the day meaning that transactions are processed during the day before you or the Manager know what the price at the end of the day will be. The price and therefore the number of units involved in the transaction are only known on the following day. The unit trust fund may borrow up to 10% of the fund value, and it may also lend any scrip (proof of ownership) up to 10% of the fund value, and it may also lend any scrip (proof of ownership) up to 10% of the fund value, and it may also lend any scrip (proof of ownership) unit trust fund may consist of different fund classes that are subject to different fees and charges. Where applicable, the Manager will pay your financial adviser an agreed standard ongoing adviser fees, which is included in the overall costs of the fund. A Collective Investment Schemes (CIS) summany with all fees and maximum initial and ongoing adviser fees a available on our website. One can also obtain additional information on Prudential products on the Prudential website. The Fund may be imported the proceeds of sales of securities and to repatriate investment income, capital or the proceeds of sales of securities and to repatriate investment income, capital or the proceeds of sales of securities and to repatriate investment income, c
