Collective Investments Schemes (unit trusts) are generally medium-to-long-term investments. Past performance is not necessarily a guide to future investment performance. Unit trust prices are calculated on a net asset value basis. This means the price is the total net market value of all assets of the unit trust fund divided by the cample in its all assets of the unit trust fund divided by the cample in its have prices, bond prices, money market prices or currency fluctuations – relevant to the underlying assets of the fund may cause the value of the underlying assets of the fund may cause the value of the underlying assets of the fund may cause the value of the underlying assets to go up or down. As a result, the price of your units may go up or down. Dint trusts are traded at the ruling forward price of the day, meaning that transactions are processed during the day before you or the Manager know what the price at the end of the day will be. The price of the day and the day and
